

Operational requirement

SAPHIR-400 has been designed to carry out a protective role for the A400M military transport aircraft in an environment of extremely diverse threats, from open conflict to crisis management.

The solution

SAPHIR-400 is an expendable chaff / flare dispensing system developed for the A400M military transport aircraft. In order to carry out its protective role for this platform, SAPHIR-400 features a very large decoy capacity and is fully integrated within the A400M Defensive Aids Sub System (DASS)

Thanks to the system's high rate of fire, its fast reaction time and its advanced software that is fully programmable by the user, SAPHIR-400 provides the highest levels of protection, reliability and safety.

It will come with a comprehensive Pre-Flight Mission Support Equipment (PFMSE) allowing Library Generation and Verification.

Status

In production

- **Fully integrated within A400M DASS**
- **Advanced software fully programmable by the user**
- **Very large decoy capacity**
- **High availability, reliability and safety**
