

EXOCET AM39 is the airborne version of the EXOCET anti-ship missile family. EXOCET AM39 can be launched from strike aircraft, Maritime Patrol Aircraft and helicopters.

With a range of up to 70 km, depending on the altitude and speed of the aircraft, the EXOCET AM39 enables the aircraft to remain at range from enemy air defences.

When carrying out a low altitude attack, the missile may also be launched under the target ship radar coverage. Ingress is at a very low altitude over the sea (sea skimming).

In service with the French Navy on its Rafale, Super-Etendard and Atlantic aircraft ATL 2 as well as with several export countries.

EXOCET AM39 has been extensively used in combat in various operational theatres.

- **Fire and Forget**
- **Launched from combat aircraft, Maritime Patrol Aircraft and helicopters**
- **Range in excess of 70 km**
- **In service with the French Navy and 11 foreign forces**

Integration

- 14 aircraft types
- Ejection launch

Propulsion

- 2 solid-propellant rockets (booster and sustainer)

Navigation

- Inertial navigation during cruise phase
- Radio altimeter

Terminal guidance

- Fire and Forget
- Active RF homing

Maximum Range

- Up to 70 km depending on launch altitude and speed

Steering

- Aerodynamic control surfaces

Warhead

- Insensitive warhead
- Optimised HE blast and pre-fragmented effects
- Impact fuze and proximity function

Name

- EXOCET AM39 Block2 mod2

Missile characteristics

- Weight: 670 kg
- Length: 4.69 m
- Diameter: 350 mm
- Speed: high subsonic
