SUPPORTING OUR CUSTOMERS

MBDA is an industry leader in missile and missile systems employing more than 12,000 employees worldwide. We are focused on innovation, collaboration and delivering world-class products created in close partnership with our customers.

MBDA created its corporate Missile Systems University to sustain and further develop core capabilities for not just its engineers, technicians and specialists but also for its partners and customers.

MBDA's Missile Systems University offers various training and education paths adaptable to your specific needs.

MBDA's large multi-lingual expert network provides training sessions and full education programmes on all topics related to missile systems lifecycle activities.

The Missile Systems University:

- shares and develops excellence
- enhances staff skills, performance and capabilities
- supports knowledge and know-how transfer
- develops positive economic and technological advantage for its customers
- develops partnerships with academia, schools and other learning bodies/entities

STEM – Science, Technology, Engineering & Mathematics: MBDA has developed award-winning and accredited Apprenticeship and Graduate Engineering schemes to develop the next generation of STEM professionals. In support of this, MBDA has established long-term partnerships with leading European universities.

MBDA IS ABLE TO PROPOSE VARIOUS LEVELS OF COOPERATION

- **Training sessions** in technology, engineering or management topics provided by MBDA specialists and speakers from European partner universities.
- **Undergraduate and Post Graduate Degrees** for engineers, in cooperation with European or local universities accredited to deliver Masters degrees.
- **PhD programmes** for graduate students in cooperation with European partner universities accredited to conduct research and deliver PhD programmes.
- **Providing opportunities for students** to participate in project work and R&D activities at MBDA sites across Europe.

MISSILE SYSTEMS University

Through the Missile Systems University, MBDA:

- shares technical knowledge, specialist expertise and 'best business and technical practice' with its customers
- establishes **strategic partnerships** with its customers for missile systems education programmes
- delivers 'core' and 'customised' courses, to the **highest standards of training and quality**
- promotes the ethos of **business, technical and operational excellence and quality** outside of MBDA
- establishes **collaborative partnerships** with 'in-country' industry, academia and professional institutes
